

How to get a COVID-19 vaccination

If patients are eligible for a covid-19 vaccination, they can find a walk-in vaccination service at the below website:

[Find a walk-in COVID-19 vaccination site - NHS \(www.nhs.uk\)](https://www.nhs.uk)

The service directs people to all sites offering walk-in COVID-19 vaccination services.

Information about which age groups can attend the sites and the opening times is available. Not all sites are open to children or young people under 16.

Some vaccination sites can only offer COVID-19 vaccination at certain times, so patients may be asked to wait or come back later.

Someone at the site will talk to the patient to make sure that the vaccination is suitable.

Alternatively, patients can *call* the below number where the Gateway team will be able to assist with locating walk-in vaccination services.

0161-947-0770 OR 0800-092-4020

If there are any housebound patients or care home residents which require a vaccination or there are any other questions or queries, please contact the Greater Manchester Vaccination team:
